

IMPERTEX

Water-proofing agent with high water-repellent power

COMPOSITION

Mix of film forming substances, compatible with all kinds of fibres.

CHARACTERISTICS

- IMPERTEX is ideal for treatments before winter of raincoats, windcheaters, trousers, snowsuits and hunting clothes.
- IMPERTEX is an essential spray for water-proofing treatment of fabrics.
- The use of IMPERTEX on clothes reduces or eliminates water and humidity penetration in them and helps dirt elimination in further washing processes.
- IMPERTEX protects items against humidity attacks and consequent moulds formation, which could bring about the deterioration of clothes' fibres.

HOW TO USE

Uniformly atomize clothes to be made water-proof and iron them with care.

In order to obtain the best possible results, after atomizing the product, dry clothes for several minutes by the drying machine at maximum temperature

TECHNICAL OBSERVATIONS-APPLICATION

- IMPERTEX is a spray product formulated with raw materials forming a film-barrier on fabric, avoiding water, liquid substances or powder absorption in fibres
- IMPERTEX's barrier effect results in a water-proofing effect on fabrics avoiding humidity absorption and consequent moulds formation, which could bring about fabrics' deterioration.
- IMPERTEX avoids the penetration of liquid or solid (powder, smog...) dirt in fibres, helping its elimination in further washing procedures and reducing the period of time necessary for stain removing treatments.
