

TERGISEK NP3

Hyper-concentrated strengthening agent for dry-clean

COMPOSITION

Mix of high concentration non-ionic and cationic surfactants dispersed in low percentage of emulsifying agents.

Light amber colour.

CHARACTERISTICS

- TERGISEK NP3 is a hyper concentrated innovative and multipurpose detergent. NP3 is the acronym for New Power Tris, as matter of fact TERGISEK NP3 combines a considerable increase of washing and cleaning power and a parallel sanitizing and softening action.
- Cleansing action: TERGISEK NP3 has top cleansing power against non soluble in solvent dirt and allows to reduce pre and post-stain removal. It can be perfectly rinsed and prevents dirt from re-depositing on the fabric, allowing to obtain bright and luminous colours.
- Softening action: TERGISEK NP3 improves the resistance to friction leaving smooth and elastic effect on fabrics and preventing them from felting during the washing process. In addition, it gives a pleasant smooth and soft effect, reducing wrinkles formation and diminishing ironing time.
- Sanitizing action: TERGISEK NP3 sanitizes clothes by the combined action of surfactants with bactericidal power, eliminating unpleasant odours caused by the formation of bacteria colonies that are present in the kind of dirt having organic origin.
- TERGISEK NP3 can be easily filtered in all filter types.
- It does not contain low ebullition point components both in the separator and in contact water's depuration system.

HOW TO USE

In case of machine washing, utilise an initial concentration of 1,5 - 3 grams of TERGISEK NP3 and every litre of solvent contained in the tank and in the filter. For any additional quantity, utilise 1% on the weight of the items to be treated (10 grams of product / every Kg of items)

For pre-stain removal or for pre-brushing we suggest to use PRESEK or REMOVERSEK.

APPLICATION AND TECHNICAL INFORMATION

- TERGISEK NP3 goes beyond the current market trend proposing double-function products, since it offers 3 essential characteristics for an advanced washing: it prevents items from becoming dull, it gives them softness and allows to obtain an antistatic and sanitizing effect.
- If regularly utilised during the washing procedure, TERGISEK NP3 remarkably reduces pre-stain removing phase.
- It protects dry cleaner's machines from possible corrosion and from the formation of unpleasant odours in that it prevents dirt deposits formation in the machine's tanks or in other parts of it.
- The high emulsifying power of TERGISEK NP3 allows to atomize water on the dirtiest items before their washing in order to increase their detergence degree.
- TERGISEK NP3 is a trivalent and complete product, which is indispensable in case the wished result is to give back to the items their initial characteristics.
